

# 2012 MdQI Conference

Quality Transportation- A Hybrid  
Approach

## An ACSLite Case Study Riva Road -

Kevin L. Newton, TSOS  
Anne Arundel County DPW

Matthew J. Allen, PE, PTOE  
Wallace Montgomery

# Agenda

- Project Introduction and Overview
- CMAQ Funding
- ACSLite Basics
- Riva Road ACSLite Deployment
- Before & After Study
- Lessons Learned
- Questions

# 2012 MdQI Conference

Quality Transportation- A Hybrid  
Approach

# Project Introduction

# Project Introduction and Overview

# Project Introduction and Overview

# 2012 MdQI Conference

Quality Transportation- A Hybrid  
Approach

## CMAQ Funding

# CMAQ Funding

- Congestion Management and Air Quality Grant
- 80% Federal contribution - 20% County match
- County fronts money and is reimbursed
- Documentation requirements
- Initiated Grant process - Fall 2008
- Received Approval - July 2009
- Completed Before Studies - March 2010
- ACSLite System On-line - November 2010
- Completed After Studies - March 2011

# CMAQ Funding

## ■ Project Costs

- Initial Estimate = \$141,200  
(County share \$28,240)
- Network Equipment Requirements ≈ \$40,000
- Engineering Studies ≈ \$27,000
- Total Project Costs ≈ \$218,000

# 2012 MdQI Conference

Quality Transportation- A Hybrid  
Approach

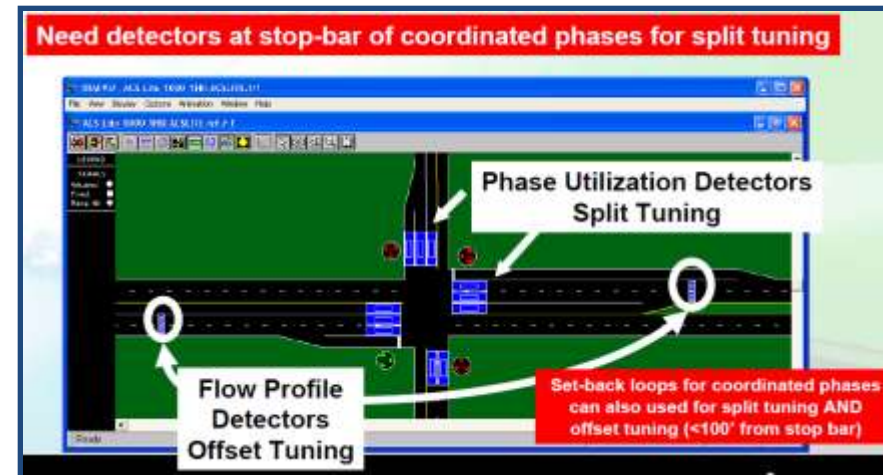

## ACSLite Basics

# ACSLite Basics

- ACSLite – Adaptive Control System
- Developed by FHWA
  - Siemens
  - University of Arizona
  - Purdue University
- Test sites in US
  - CA, FL, OH, TX
  - CA, OH, TX, MD

# ACSLite Basics

- Closed loop signal system
- Recommend fiber connectivity
- System continuously monitors signals and traffic flow
- Adjusts Real Time
  - System Offset Times
  - Signal Split Times
- Signal Cycle Lengths are not adjusted

# ACSLite Basics

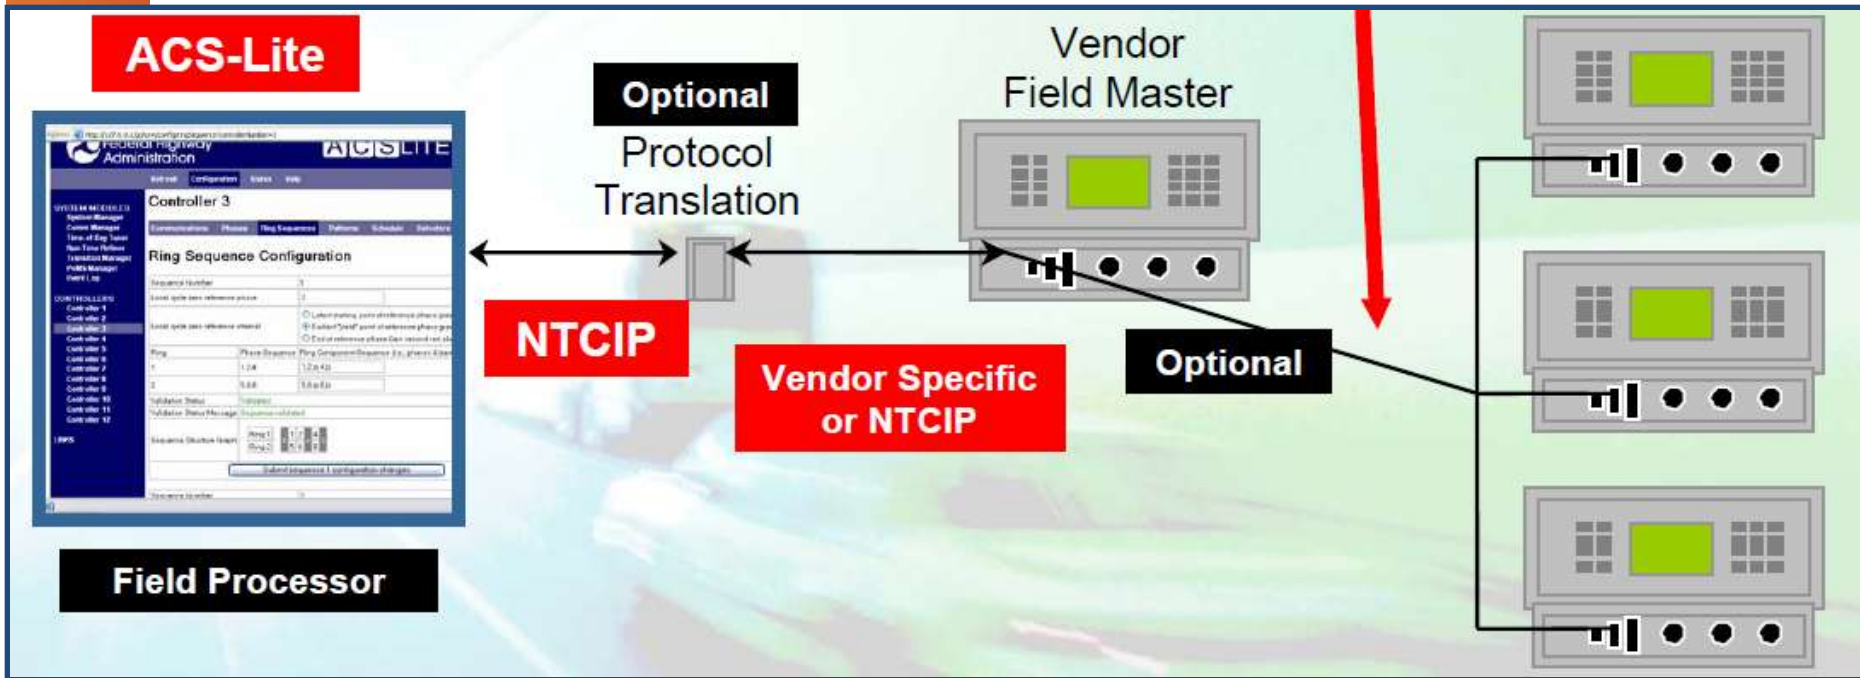

- Evaluate & Monitor
- Provide Refinements
- 3 Levels of Optimization
  - Time of Day
  - Runtime Refiner
  - Transition Manager

# ACSLite Basics

- Typical ACSLite Field Application

# ACSLite Basics

- Riva Road ACSLite Field Application

# ACSLite Basics

## ACSLite Screen Shot – Detector Status

**Controller 2 - Riva Rd @ Forest Dr**  
 Estimated Controller Time: 10:08:52 AM  
 Pattern: 103  
 Cycle Time: 110  
 Offset Time: 57

**Configured Pattern Timeline**  
 The following timeline portrays coordinated phasing for pattern 103 under full demand for all phases.

Local Cycle Time

	0	5	10	15	20	25	30	35	40	45	50	55	60	65	70	75	80	85	90	95	100	105	110
Ring 1	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2
Ring 2	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6

**Actual Phasing Timeline**  
 The following color-coded timeline portrays active phases timed during recent signal cycles.

10:07:47 AM (Pattern 103 - Coordination)

Ring 1	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2
Ring 2	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6

10:05:57 AM (Pattern 103 - Coordination)

Ring 1	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2	2
Ring 2	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6	6

10:04:07 AM (Pattern 103 - Coordination)

2012 MdQI  
Conference

Quality Transportation- A Hybrid  
Approach

# Riva Road ACSLite Deployment

# Riva Road ACSLite Deployment

- Wait for the completion of Fiber installation
- Installed 20 new Video Detector Cameras
- Upgraded signal controllers to accept network connectivity (NTCIP)
- Installed dedicated ACSLite computer
- Assisted by
  - RGA, LLC / Siemens
  - County Signal Technicians
  - County Information Technology Technicians

# 2012 MdQI Conference

Quality Transportation- A Hybrid  
Approach

## Before & After Study

# Before & After Study

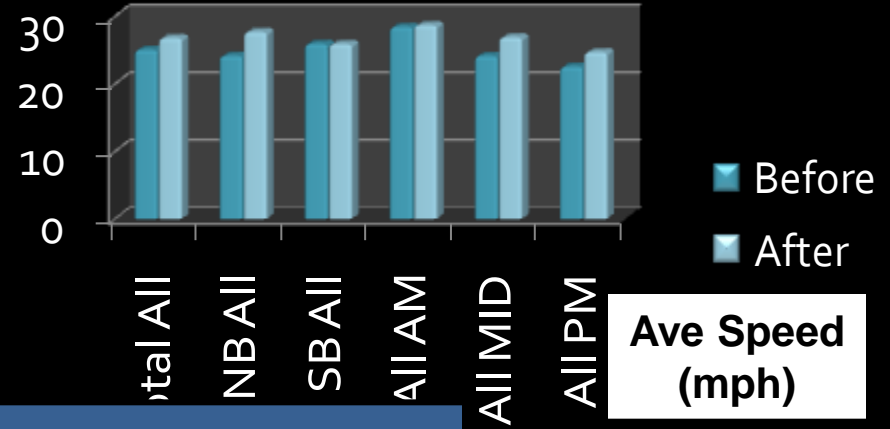

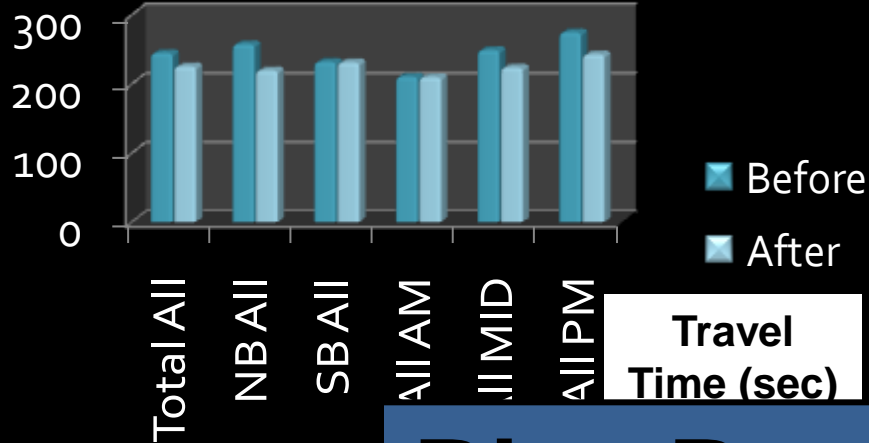

- CMAQ evaluation requirements
- Select Measures of Effectiveness (MOEs)
  - Travel Time and Delay
  - Vehicle Emissions
  - Minor Street Queues
- Analyzed two “Corridors”

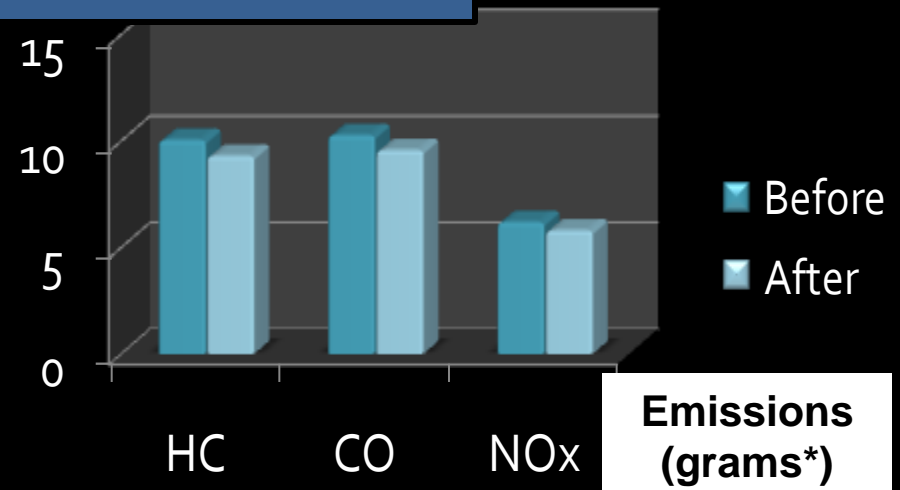

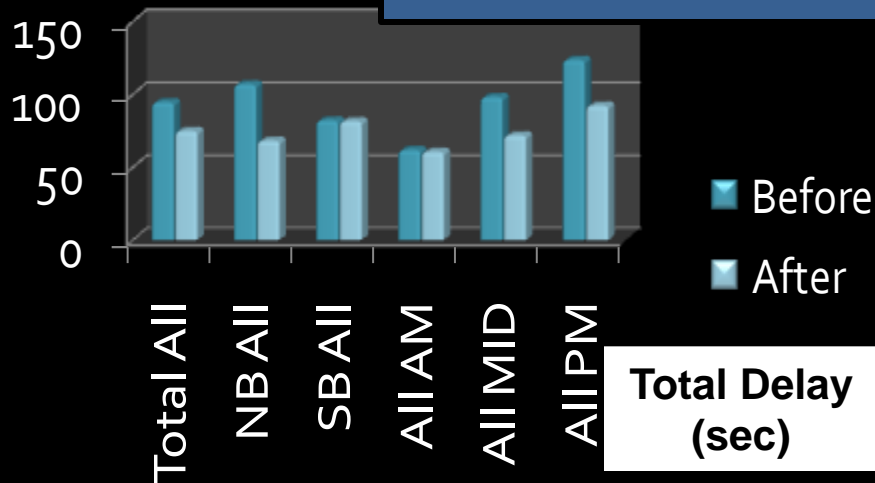

# Before & After Study

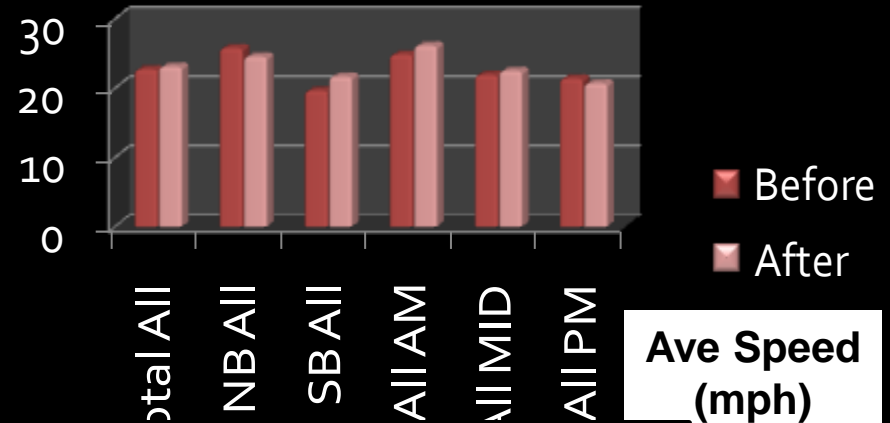

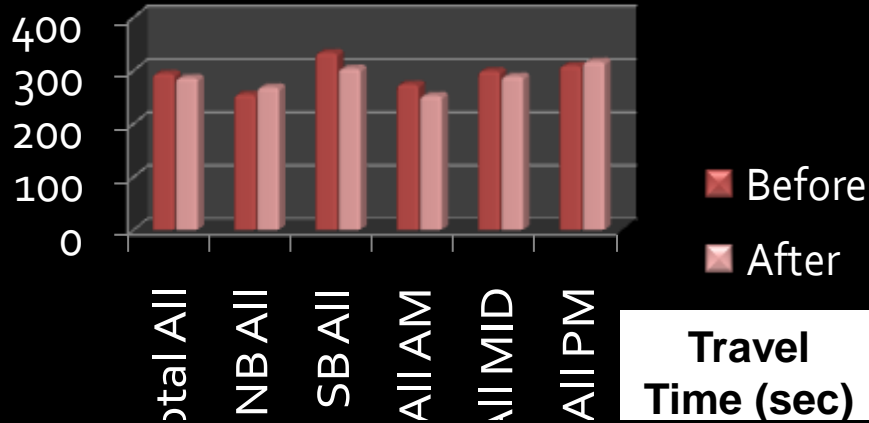

# Before & After Study

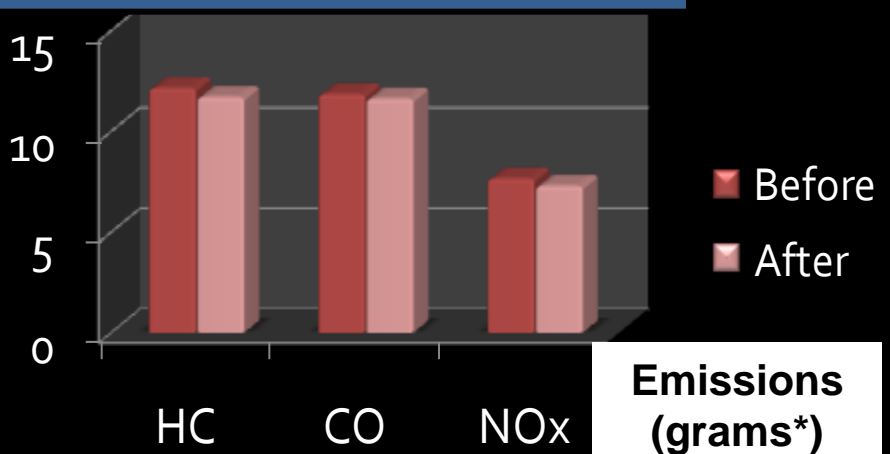

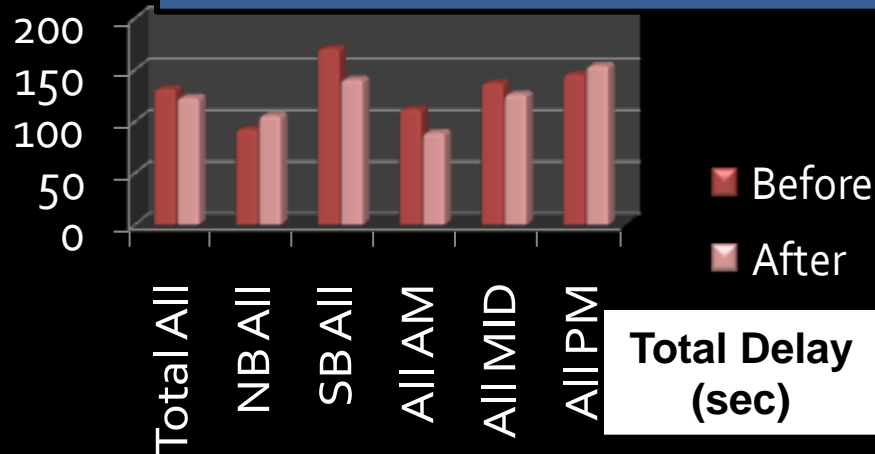

## Riva Road Corridor

# Before & After Study

## Riva Rd / Forest Dr Corridor

# 2012 MdQI Conference

Quality Transportation- A Hybrid  
Approach

## Lessons Learned

# Lessons Learned

- Accurate Baseline System
  - “Groundhog Day Effect”
- Detection, Detection, Detection
- Infrastructure/Communications Link
- Emissions Computations
- Use of Technology for Data Collection

**Would we do  
it Again?**
